Carbon Black.

The Leader in Next-Gen Endpoint Security

With over 3,000 customers globally—including 30 of the Fortune 100—and over 9 million endpoints under protection, Carbon Black is the leading choice for next-gen endpoint security. Whatever your endpoint security needs and goals, and wherever you're starting, our solutions enable you to replace ineffective antivirus, lock down your servers and critical systems, and arm incident response teams with the most effective tools to hunt and shut down threats. In short, we're here to help.

Hackers: It Takes One to Know One

Carbon Black was founded by former members of the U.S. government's elite team of offensive security hackers. Trained by the NSA and CIA, our founders possessed early insights into the tools and techniques of 21st century cyber hackers; namely, how to get around the defenses you deploy every day. For more than 15 years, our leadership and software have used that experience to outpace increasingly sophisticated attacks.

Pioneers, Innovators & Disruptors

We are bringing you a new generation of endpoint security, purposely designed to protect your organization from the most advanced cyberattacks. Our pioneering approach to application control, endpoint detection and response (EDR), and next-gen antivirus (NGAV) has been proven by thousands of customers as well as leading independent third parties.

Awards and Recognition

LEADER
IDC 2017 Endpoint STAP MarketScape

WINNER
SANS Institute Awards: Best Endpoint Detection & Response Solution

LEADER
The Forrester Wave™: Endpoint Security Suites, Q4 2016

PERFECT PREVENTION SCORE
Advanced Endpoint Protection (AEP) Test by NSS Labs

A VISIONARY
Gartner Magic Quadrant for Endpoint Protection Platforms, January 2017

TOP 100 COMPANY
Forbes Cloud 100 (top cloud companies)

Carbon Black.

AI and Machine-Learning Are Not Enough to Stop All Attacks

Attackers have moved beyond malware, accounting for 53% of today's breaches, of which machine-learning is useless against. Carbon Black's streaming prevention goes beyond machine-learning AV to stop all types of attacks before they compromise your system.

CAPABILITY	STREAMING PREVENTION	MACHINE-LEARNING AV
Stops malware attacks	✓	✓
Stops non-malware attacks	✓	✗
Difficult to bypass, even by skilled attackers	✓	✗
Total visibility into origin of attacks	✓	✗
Applies advanced algorithm to files	✓	✓
Applies advanced algorithm to processes and information	✓	✗
Lightweight on the endpoint	✓	✓

Most Proven Next-Gen Endpoint Security

CB DEFENSE

Next-Gen AV + EDR

- Stops all types of attacks, even those that don't use malware at all
- Provides complete visibility in real time so you can respond immediately
- Single agent deployed from the cloud protects without compromising user productivity

CB RESPONSE

IR & Threat Hunting for SOC Teams

- Unlimited data collection shows you everything so you don't miss a thing
- Unparalleled visibility reduces investigations from days to minutes
- Responds in real time to minimize damages and even hunt down threats proactively

CB PROTECTION

Application Control for Servers & Critical Systems

- Stops all types of attacks and prevents unwanted changes with leading application control
- Maintains compliance for all systems no matter what framework you follow
- Automatic approvals and policy templates make high enforcement easily scalable
