

Security

Delivered @ the speed of business

Intelligent, identity-infused security, access and compliance management

Protecting Information Assets

In a changing and complex computing landscape defined by mobility, social identity and cloud services, control and visibility is critical for the detection and disruption of threats to your information assets. NetIQ's intelligent, identity-infused security and access management solutions make it easier for you to monitor, manage and measure events and user activity in your environment to protect your data and adhere to compliance policies and requirements.

NetIQ at the Center of Information Access

NetIQ solutions focus on the dynamic points of interaction between information, devices and people—from network to cloud and from desktop to mobile device. Our solutions authorize, authenticate and monitor user access throughout the entire collaborative lifecycle, providing accountability and demonstration of compliance for the protection of your most critical data, while making users more productive and efficient.

Helping You Add Value to Your Business

IT trends shape the ways in which you deliver your organization's critical services. Every day, you see how your ability to respond and adapt to IT trends impacts your business. NetIQ is focused on helping you align today's technologies and hybrid delivery of services with your users' needs to deliver the greatest benefit and value.

With ease and simplicity, NetIQ's intelligent, identity-infused access and monitoring capabilities ensure information and resources are delivered to the right people at the right time, at the speed your business demands.

Using a hands-on approach, NetIQ helps you more easily manage IT complexity, reduce organizational risk, deliver value and capitalize on your business' emerging opportunities—today and tomorrow.
